Pier 12, and Bulkhead foot of Albany Street,

North River.

Pier 12, of which the City owns the north half, is a block and bridge Pier, three hundred and forty-four feet long and forty feet wide, with eleven feet water at outer end, and eight to twelve feet at inner end. Is in bad condition, and must be rebuilt, at a cost to the City of about $7,500

Present value of north half of Pier, about 40,000

Value when rebuilt, about 75,000

Value of Bulkhead, about $118,000

Scale 120 Feet to the inch

Pier 13, and Bulkhead between Albany and Cedar Streets, North River.

Pier 13 is a block and bridge Pier, six hundred and four feet long, average width sixty feet, with fifteen to twenty-three feet water at outer end, and three to seven feet at inner end. Is in a very bad condition, and should be rebuilt, and widened at the outer end, according to dotted lines on the map, to a parallel width of fifty-two feet. Cost to rebuild and widen, about $30,000

Present value of Pier, about $120,000

Value when rebuilt and widened, about $300,000

The Bulkhead is in good condition; its value is about $118,500

To extend this Pier to Pier line, a distance of seventy-seven feet, giving twenty-eight feet water at outer end, would cost about $20,000

Value of Pier when rebuilt, widened, and extended, about $350,000

Pier 18, and Bulkhead foot of Courtlandt Street, North River.

Pier 18 is a block and bridge Pier, six hundred and one and one-half feet long, average width fifty-seven feet, with fifteen to sixteen feet water at outer end, and seven feet at inner end. Is in very bad condition; must be rebuilt, at a cost of about $25,000

The present value of this Pier is about $150,000

Value when rebuilt, about $300,000

Twenty-three feet of Bulkhead in good condition. Value about $69,000

To extend this Pier to Pier line, a distance of ninety-four feet, giving twenty-five feet water at outer end, will cost about $18,000

Value of Pier when extended, about $350,000

This Pier evidently belongs to the city, unless the parties claiming the north side have a special grant for the same.

Piers 20, 21, and 22, and Bulkheads between, at West Washington Market, North River.

Pier 22 and the Bulkheads between 20 and 21, and 21 and 22, are in a very bad condition.

Pier 20, block and bridge Pier, three hundred and thirty-nine feet long, fifty feet wide, with twenty-four to twenty-six feet water at outer end. In good order. Value, about $250,000

Pier 21, block and bridge Pier, three hundred and fifty-two feet long, forty feet wide, with twenty-three to thirty feet water at outer end. Is in good order. Value, about $246,400

Pier 22, block and bridge Pier, two hundred feet long, thirty-five feet wide, with nineteen to thirty-five feet water at outer end. To rebuild and raise, will cost about $12,000

Cost to the city, about $6,000

Present value of the city interest, about $29,000

Value of city interest when rebuilt, about $61,250

To rebuild Bulkhead foot of Dey street, to rebuild and raise Bulkheads between Piers 20 and 21, and 21 and 22, three hundred and seventy-eight and one-half feet in all, will cost about $7,600

Present value, about $343,500

Value when rebuilt, about $393,250

Pier 38, foot of Hubert Street,

North River.

This Pier, for a distance of one hundred and ninety-four feet from Bulkhead, requires to be rebuilt, and the outer end repaired. The cost of rebuilding and repairing will be about $10,000

The outer end of the Pier is solid.

Present value of this Pier is about $351,000

There should be two Piers extended from this Pier to the Pier line, giving twenty-three feet water at outer ends, as shown by dotted lines on map, at a cost of about $40,000

Value when extended, about $450,000

Pier foot of Fortieth Street,

North River.

A bridge, Pier except a block at outer end; is four hundred and fifty feet long, and forty feet wide; with from nine to eleven feet water at outer end, and bare at inner end. This Pier is in bad condition, and wants to be rebuilt and raised at a cost of about $15,000

Present value, about $30,000

Value when rebuilt and raised, about $50,000

This Pier could be extended to the Pier line a distance of sixty feet, at a cost of about $4,000

The Pier so extended would have sixteen feet water at outer end, and would be worth about $50,000

Pier foot of Seventy-ninth Street,

North River.

Block and bridge Pier, three hundred and thirty-one feet long, forty feet wide at the outer part (which is block and bridge); width of inner part (which is solid) one hundred and two feet. Depth of water at outer end fourteen to twenty-four feet, bare at inner end.

This Pier requires to be thoroughly rebuilt and raised, at a cost of about $8,300

Present value, about $35,000

Value when rebuilt and raised, about $45,000

To extend the Pier ninety-three (93) feet to the Harlem, would give twenty-four feet water, at inshore end, $15,000

Value of Pier when rebuilt, raised and extended, about $60,000

Piers and Bulkhead foot of One Hundred and Thirtieth and One Hundred and Thirty-first Streets, North River.

Pier at the foot of One Hundred and Thirtieth street, is a solid Pier, filled in with earth; average length sixty feet, average width ninety-eight and one-half feet, with seven to nine feet water at outer end, and bare at inner end. It is in good order.

Value of this Pier, about $25,000

This Pier must be connected to the Pier One Hundred and Thirty-first street, a distance of one hundred and fifty-eight feet, making it a solid Pier, at a cost of $6,000

The Pier when extended will be worth about $45,000

There is a piece of property, of fifteen feet four inches, on the south side of the Pier on the line of the Bulkhead, belonging to the city, worth $5,000

Value of Bulkhead between One Hundred and Thirtieth and One Hundred and Thirty-first streets, distance of one hundred and forty-seven feet, is about $14,700

Pier at the foot of One Hundred and Thirty-first street is a solid Pier, filled in with stone and earth, wanting about forty tons of stone, and about the same quantity of earth to repair it, which will put the Pier in thorough order, at a cost of about $100

Value, about $45,000

Pier foot of One Hundred and Fifty-fifth Street,

North River.

This is a solid Pier, average length sixty and one-half feet, average width fifty-five and one-half feet; depth of water five feet at outer end, and bare at inner end.

Wants repairs to the amount of about $730

Value at present, about $10,000

If this Pier was extended one hundred feet, which would give an average depth of about fifteen feet of water, and 6000 yards of filling, it would be worth $10,000

Value of Pier when extended, about $20,000
